Project templates

There are two templates predefined in the program:

- **FMEA Project** (Failure Mode Effects Analysis Project). Select this template if you need the reliability analysis only.
- **Safety and Reliability Analysis Project** (FMEA Project included). Select this template if you need both - the FMEA and risk analysis.
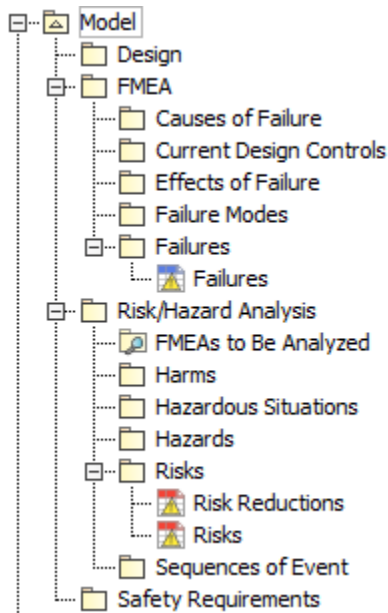

Both template contains predefined packages and diagrams to start creating your risk analysis model. Usually, design, FMEA, Risk/Hazard Analysis, Safety Requirements packages are created.

To create a project from a template

1. Do one of the following:
   - From the **File** menu, select **New Project**.
   - On the main toolbar, click the **New Project** button.
   - Press Ctrl+N.

   In all cases, the **New Project** dialog opens.
2. In a left side of the dialog under the **Safety and Reliability Analysis** group, double-click the icon of a desired template. The project template with predefined tables, samples, and resources opens.
3. Type a project name, specify a project location, and click **OK** when you are done. A new project opens.
