

Properties tab

The **Properties** tab at the bottom of the Model Browser allows you to quickly access basic information about a selected element or diagram.

An example of the Properties tab in the Quick properties panel

Multiple selection

- If multiple elements or symbols of different kinds are selected, only their common properties are displayed in the **Properties** tab.
- If more than 10 elements in the Containment tree or symbols on the diagram pane are selected, properties are displayed only by request. You

need to click the link **Show common properties for the selected items**.
To open the **Properties** tab, do one of the following

- In the Model Browser, click the **Properties** tab.
- On the **Window** menu, click **Properties**.

The **Properties** tab includes the following tabs:

Tab name	Description
Element	Contains the main properties of the element's or diagram's specification.
Symbol	Contains the element symbol's properties. <div>This tab is available for symbols only.</div>
Tags	Contains the tagged values of the selected element.

Language properties	Contains the same data as the Language Properties property group in the element's Specification window. <div> This tab is available only for the elements used for code generation, that is, class, attribute, operation.</div>
Traceability	Contains the same data as the Traceability property group in the element's Specification window.
