Actual Project Milestone Creation Wizard

The Actual Project Milestone Creation Wizard is used to define a new milestone for the selected project.

To open the Actual Project Milestone Creation Wizard

- 1. Open a AcV-2 (MODAF), Lr Lines of Development (NAF 4.0), NPV-1 (NAF), PV-2 (DoDAF 2.0).
- 2. Select a project.
- 3. Do one of the following:
 - On the diagram toolbar, click Add New > Milestone.
 - On the selected project shortcut menu, click Add new Actual Project Milestone.
- 4. Select one of the available milestone kinds:
 - Out Of Service Milestone
 - Increment Milestone
 - Deployed Milestone
 - No Longer Used Milestone
 - Actual Project Milestone

The Actual Project Milestone Creation Wizard opens.

The wizard consists of three steps:

1. Milestone name, kind, and date specification.

In this step, you can specify a name of a new Milestone you are creating.

You can select one of the Milestone kinds, which are:

- Out Of Service Milestone
- Increment Milestone
- Deployed Milestone
- No Longer Used Milestone
- Actual Project Milestone

Also you can set the Milestone date and time. Date and time indicates the position of the milestone in the project time frame. For more information on setting date ant time, see Date and Time Settings dialog.

1. Specify Name, Kind and Date 2. Select Actual Project Milestone Type 3. Specify Project Status at a particular Milestone	📃 Enter	1_1 ial Proje Service! te and ti i0T18:24 line:	ct Milesto Allestone me: I: 19+02:	one kind: : [Instanc		ation]

2. Project milestone type specification.

You can select one (or both) of the given milestone types:

- DLOD Milestone
- DOTMLPF Milestone

You can create your own milestone type as well.

1. Specify Name, Kind and Date 2. Select Actual Project Hilestone Type 3. Specify Project Status at a particular Hilestone	Q- Eg Tree List J matches found DLOD Miestone MMMiestone MMMiestone	Selected elements: 1
	< Back	Next > Finish Cancel

3. Project status specification at a particular Milestone.

After creating a new milestone, you can apply the project status according to the selected milestone type. Each milestone type can have specific project threads and status indicators.

	DLOD Milestone type	DOTMLPF Milestone type
Project threads	 Equipment Logistics Infrastructure Organization Doctrine/Concepts Information Personnel Training 	 Doctrine Organization Training Materiel Leadership Personnel Facilities
Status indicators	 DLOD Absent Not Required No Outstanding Issues Manageable Issues Critical Issues 	 Materiel Solution Analysis Technology Development Engineering and Manufacturing Development Production & Deployment Operations & Support

You can also define you own milestone type with a custom set of project threads and status indicators.

To create project threads and status indicators

- 1. In the Project Thread area, click the Add button.
- 2. Specify the thread name.
- 3. In the Status Indicator area, click the Add button.
- 4. Specify the indicator name.
- 5. Click the Fill Color button.
- 6. In the Color dialog select the color and click OK.

To create a second thread with the same status indicators, select a previously created thread and click the Clone button. A new thread with previously defined status indicators are created.
