

BPMN Resources Description Table

Description

A BPMN Resources Description table is designed to display or edit resources description in a table form. You can display existing Resources or create new ones in this table.

BPMN defines four types of Resources as follows:

- Resource
- Organization Unit
- Role
- Person
- Information System

You can display all of them in a BPMN Resources Description table.

Example

#	Name	Documentation
1	 Accounting Manager	Accounting manager is responsible for daily tasks related with customer accounts; planning, monitoring, appraising, and reviewing job contributions; planning and reviewing compensation actions; enforcing policies and procedures.
2	 Consultant	Consultant is providing consultations for customers and providing training courses.
3	 Head of Accounting Department	Head of accounting department is responsible for meeting accounting financial objectives by forecasting requirements; preparing an annual budget; analyzing variances.
4	 Head of Sales Department	Head of Sales Department is responsible for ensuring smooth work of all the salesmen.
5	 Salesman	Salesman organizes training classes. He is also responsible for finding participants for training classes and the registration of participants.
6	 Solution Architect	Solution architect is providing professional tailoring services.
