

Displaying MagicDraw Data Sources in DataHub Explorer

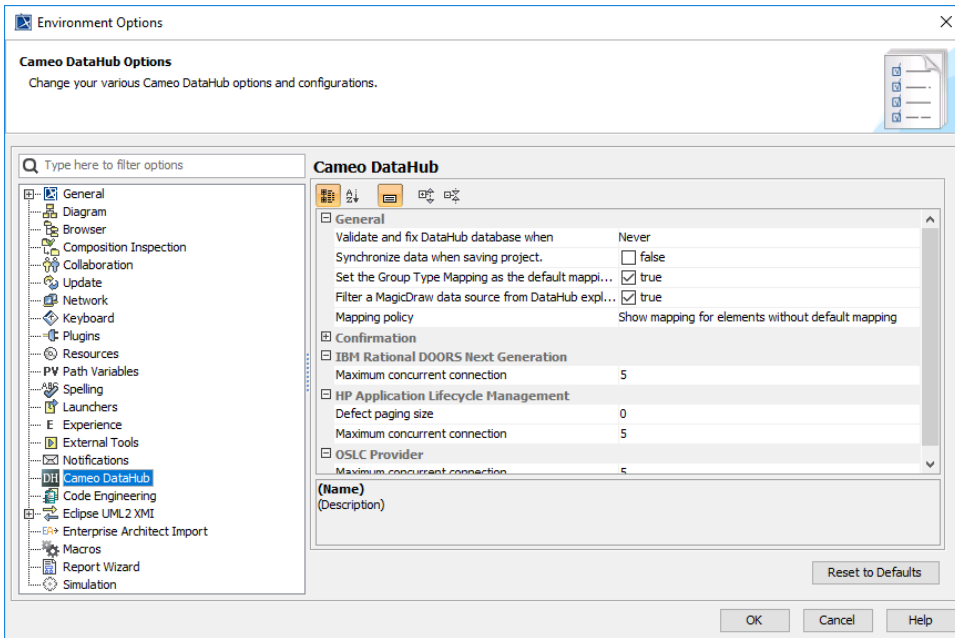

By default, MagicDraw® Data Sources are not shown in the [DataHub Explorer](#) tab. However, you can display MagicDraw® Data Sources in the DataHub Explorer tree through the Cameo DataHub Environment options.

To display a MagicDraw® Data Source in the DataHub Explorer tree

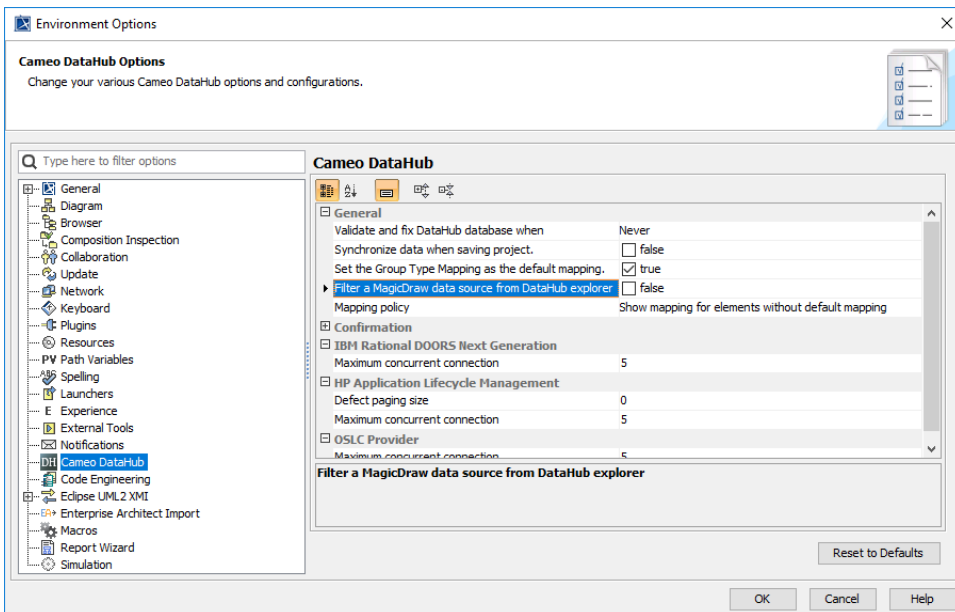

1. From the MagicDraw main menu, click **Options > Environment**. The **Environment Options** dialog opens.

2. On the left-hand side of the dialog, select **Cameo DataHub** in the list.

3. In the **General** group of options, clear the **Filter a MagicDraw data source from DataHub explorer** ☒ true check box.

4. Click **OK**. A MagicDraw® Data Source now appears in the **DataHub Explorer** tab.
