

# Working with Security Role-based Connectivity Table

You can fill in a Role-based Security Connectivity Table by adding new or existing Resource Exchanges.

## Adding existing Resource Exchanges in a Security Role-based Connectivity Table

To add an existing Resource Exchange

---

1. In the table toolbar, click the **Add Existing** button. The **Select Resource Exchange** dialog opens.
2. Click **+** button to select one of the following Resource Exchange types:
  - Resource Exchange
  - Command
  - Control
3. Click **OK** when you are done.  
The rows with selected Resource Exchanges are added to the table.

- Resource Exchanges Identifier, Resource Exchanges Item Name, Producing and Consuming Functions, and wide range of measurement cells are allowed to edit in the table.
- Sending Resource, Receiving Resource, and Implements cells are read only.
- You can use [Resource Exchange Manager dialog](#) that enables to analyze and manage the Resource Exchange data.
