# Importing data from Excel

The last and final step in importing requirements as SysML objects into MagicDraw from Excel is to import the data rows themselves.
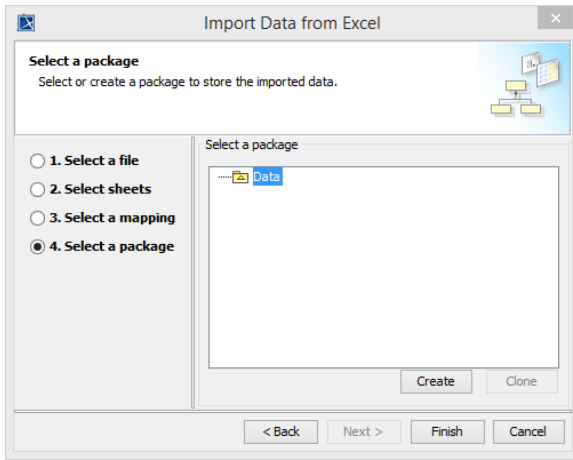

To import data from Excel

1. Click **File** > **Import From** > **Excel/CSV File** from MagicDraw main menu. The Excel Import dialog should open. Select the last option, **Import Data from Excel** and click **OK**. The **Import Data from Excel** wizard should open, see figure below. Click the Browse button to browse and locate an Excel file you wish to import. Click Next > .

2. Select the mapping you wish to use from the right hand side pane. Click Next > .

3. In step four of the wizard, select a package from the right hand side pane and click

Finish
.

4. The result of the import will be as shown below.
