Updating Server Projects

When updating a project, the latest project version from the server is loaded. A new version of a project is created every time a user commits new data to the server.

Model elements that are locked for will not be updated.

When updating *lock information*, the list of elements that are locked by other users is refreshed. You should update a project when you know that a new project version is available on the server.

To update the whole project

- From the Collaborate menu, select Update Project, or press CTRL+U.

To update elements that are locked by other users

- From the Collaborate menu, select Update Lock Information, or press CTRL+SHIFT+U.
