

Property restriction from a different namespace

Change the Owned by of the property 'has child' to Association and then move the Association to a different concept model, *Functional* and then export the Functional concept model

```
Ontology(<http://example.com/ontology/Functional>

Declaration(Class(:Husband))
Declaration(Class(:Wife))
Declaration(ObjectProperty(:hasChild))

#####
#   Object Properties
#####

# Object Property: :hasChild (has child)

AnnotationAssertion(rdfs:label :hasChild "has child"^^xsd:string)
AsymmetricObjectProperty(:hasChild)
ObjectPropertyDomain(:hasChild <http://example.com/ontology/Asymmetric#BiologicalMother>)
ObjectPropertyRange(:hasChild <http://example.com/ontology/Asymmetric#Child>)

)
```
