

Symbol Standard Expert Configuration

Using the **Symbol Standard Expert Configuration** property, you can specify properties visibility mode:

- in the DSL element [Symbol Properties dialog](#),
- in the [symbol shortcut menu](#), and
- in menus that open after clicking the [Compartments](#) or Create Element smart manipulators.

To customize Standard Expert mode

1. Create a customization element for the DSL element or select an existing one.
2. In the element [Specification window](#), click the **Symbol Standard Expert Configuration** property and then click the button.
3. In the [Customize Properties dialog](#), click to select the mode to display the property in the DSL element Symbol Properties dialog and in other places.
4. Reopen the project.
