Exporting your concept model to an OWL ontology

In this section, you will find a series of pages outlining the process in exporting your concept model to an OWL ontology. The process is as follows:

- Setting destination for the OWL export folder
- Setting the concept model export syntax
- Setting the concept model export URI style
 Setting the concept model URI
- Specifying file export paths
- Specifying IRI ontology versions
 Use Path Variables to Export a Concept Model to an OWL Ontology
- Exporting your concept model
- Exporting models and concept models at any level in package hierarchy
- View the CCM watermark in an exported OWL
