

# What's new in UPDM 2 plugin 18.0 LTR SP2

Release date: 29th September 2014

Service Pack 2 (SP2) for UPDM 2 plugin 18.0 LTR (Long-Term Release) includes the following improvements:

- The Control Flow is now represented as a dashed line in SysML Activity diagram.
- The name for the Behavior is set automatically when naming its Operational Activity Action. When you change the name of the operational activity, the name of the action is changed automatically if that behavior has no other actions with different names.
