What's new in UPDM 2 plugin 18.0 LTR SP3

Released on: February 9, 2015

Main Issues Fixed in This Service Pack

- Performance is slow when working with OV-3/SV-6 Role Based tables.
- The plugin stops responding, when trying to use DISR, UJTL, and Joint Conditions elements.
- A syntax error occurs, when trying to create an SV-6 Report.
- Node Role and Resource Role Impact Analysis Maps cannot be created by clicking **Create Diagram** on the shortcut menu of a Node Role or a Resource Role.
- The Operational Exchange or Resource Interaction is bidirectional in OV-2 and SV-2 Internal diagrams while aggregating Nodes or Systems Resources and displaying them in different contexts.
- The primitive types (such as boolean, integer, real) are not available in the **Select Type** dialog.
- The direction of the Organizational Project Relationship is incorrect between Actual Project and Actual Organization in PV-1.
