What's new in UPDM 2 Plugin 18.0 LTR SP5

Released on: December 2, 2015

The Issues Fixed in This Service Pack

- It is impossible to rename Port by pressing F2.
- It is available to create wrong relationships from the shortcut menu in the CV-6 (Maps To Capability) and CV-7 (Capability Of Performer, Exhibits) matrices.
- Incorrect descriptions of the context relation in the Node Impact Analysis Map, Node Role Impact Analysis Map, Resource Role Impact Analysis Map, and Resource Impact Analysis Map.
- An SV-8 diagram is non editable and its owner (Whole Life Configuration) don't set as a Context element.
