

What's new in Cameo Business Modeler Plugin 18.0 LTR

Release date: 2nd June 2014

Minimized Business Analyst Perspective UI

Shortcut menus and diagram pallets in the Business Analyst perspective have been reviewed and shortened leaving only common BPMN elements and diagrams – the artifacts used for minimum modeling needs.

Increased Modeling Efficiency in Organization Structure Diagram

Organization structure elements can now be easily created by using the smart manipulation buttons or BPMN Resources Description table.

New Project Template for Banking Organizations

The new **APQC – Banking PCF** model template provides the predefined structure of processes relevant to banking organizations.

Fixed Issues

To open the list of publically available or your own issues those have been included into version 18.0 LTR, click [here](#).
