Teamwork Server installation and licensing

Prerequisites

- Ensure your machine meets the minimal system requirements for running the server.
- An appropriate JVM version is installed on your machine.
- You have the installation files downloaded from your account at www.nomagic.com.
- The Teamwork Server installation file should have *read* and *execute* permissions.

Installation workflow

1. Install the server following the installation instructions according to your operating system.
2. Activate the license (for paid commercial licenses only).
3. Add the license.
