2022x Refresh2 Version News
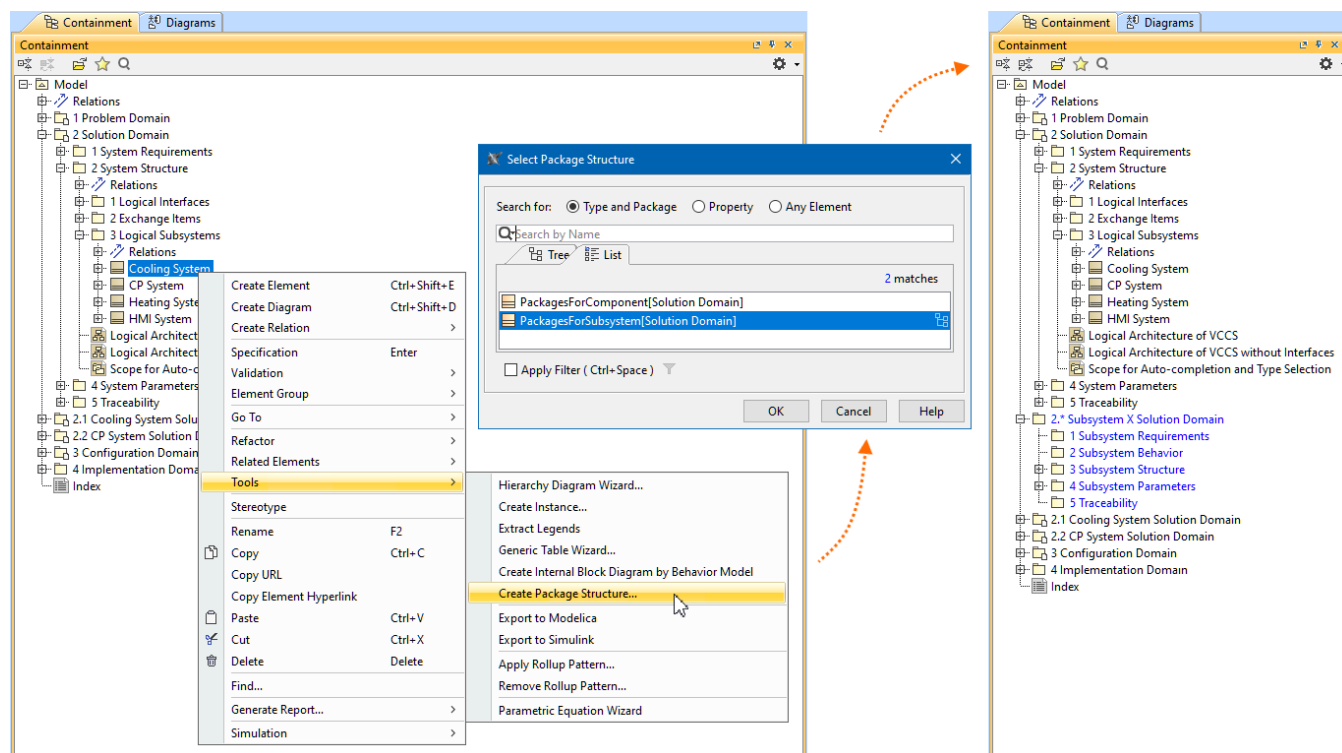

SysML Plugin

SysML Plugin 2022x Refresh2 introduces improvements to MagicGrid projects, as now you can easily create additional MagicGrid package structures for components and subsystems in MagicGrid projects.

Automated Package Structure Creation in MagicGrid Projects

2022x Refresh2 introduces a means to easily create a MagicGrid-based package structure for a block that represents a logical subsystem or component within the solution domain model. Previously, this could have been achieved by copy-pasting the package structure of an existing subsystem or component; however, now you can use the **Create Package Structure** command, providing you with a fast and easy approach.

Creating a MagicGrid-based package structure via the **Create Package Structure** command.
