

# 2024x News for Developers

## OpenJDK Version Update

Desktop applications (MagicDraw, Cameo Systems Modeler, Cameo Enterprise Architecture, Magic Software Architect, Magic Cyber Systems Engineer, Magic Systems of Systems Architect) and Teamwork Cloud are now only run using OpenJDK 17.0.8+7 version instead of the OpenJDK 11.0.18+10\* version.

## Identifying Plugin Dependencies by Class Name

A new functionality is introduced that allows you to identify plugin dependencies by class name. For more information, see the [Identifying plugin dependencies](#) page.

## Revised Value of the Constants

The values of the constants for SimulationProfile, SimulationOptions, and SysMLConstants are updated. For more information, see the [API Changes](#) page.
