# Including property definitions in the Natural Language Glossary

Concept Modeler can also display property definitions, in addition to class definitions, in the Natural Language Glossary through the Include property definitions in the Natural Language Glossary option in the Project Options dialog.

To enable the Include property definitions in the Natural Language Glossary option

- 1. From the main menu, select **Options > Project**. The **Project Options** dialog opens.
- 2. In the tree structure on the left, expand General and select Concept Modeling.
- 3. At the Include property definitions in the Natural Language Glossary option, select the check box to set it true.

# CCM Natural Language Glossary

# Α

# abbreviation

A property that is used by the class MetricDefinition.

Definition:

### abbreviation

A property that is used by the class <u>validationRule</u>.

**Definition**: Specify a short word, phrase, or acronym of the validation rule. It allows you to distinguish the validation rules among other rules when sorting or filtering.

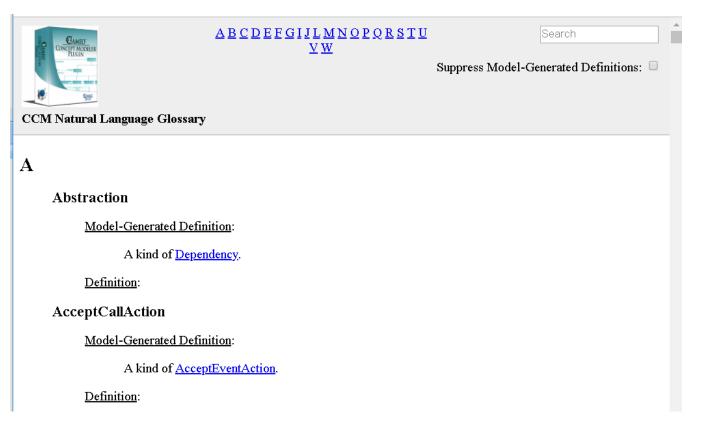

# abbreviation

A property that is used by the class ParameterDefinition.

# Definition:

The property definitions are displayed when the 'Include property definitions' in the Natural Language Glossary option is set.

Otherwise, the Natural Language Glossary will look like the following figure. Notice the lack of the "Properties."

The property definitions are not displayed when the 'Include property definitions' in the Natural Language Glossary option is not set.
