# Importing table headers from Excel

To import table headers from Excel file
---

1. Click **File** > **ImportFrom** > **Excel/CSV File** from MagicDraw main menu.
2. The Excel import dialog opens, shown in the figure below. Choose first option, **Import Table He ading from Excel**. Click **OK** to continue.

3. A wizard interface guides you through the import options. The first step is to select your Excel file. Click the **Browse** button to browse and locate your Excel file. Click **Next >** as in the figure below.
4. In step two of the wizard, select the sheets you'd like to import.

5. In step three, select a target package you want to import into.

6. In step four, select the diagram options, see first figure below. Click **Finish** to exit the wizard.

7. The table headers will be imported into MagicDraw containment tree along with a diagram object as shown in the second figure below.
