

Getting started with specifying criteria

The dialog for specifying criteria can be opened from several different places.

To open the dialog for specifying criteria, do one of the following

- In the **Criteria** area of a [dependency matrix](#), click the ... button next to the **Dependency Criteria** box. The **Dependency Criteria** dialog opens.
- In the **Criteria** area of a [relation map](#), click the ... button next to the **Relation Criteria** box. The **Relation Criteria** dialog opens.
- Open the [Specification window](#) of a [smart package](#), under the **Content** category on the right, click the cell of the **Query** property value, and then click the ... button. The **Query** dialog opens.
- Open the Specification window of a selected element, click [Traceability](#) on the left, and then click **Create** on the right. The **Expression** dialog opens.
- On the toolbar of a generic table, click the **Columns** button, and then select [New Derived Property](#). The **Expression** dialog opens.
- Open the Specification window of an [opaque behavior](#), click the cell of the **Body and Language** property value, and then click the ... button. When the **Body and Language** dialog opens, select **StructuredExpression** from the **Language** drop-down list.
- Open the Specification window of a [Legend Item](#), click the specification cell of the **Elements by Condition** property, and then click . The **Elements by Condition** dialog opens.

The layout of the dialog is the same in all the described cases. On the left side of the dialog, you can select an operation type that best suits for specifying the needed criterion. Selecting an operation type opens the criteria specification panel on the right side of the dialog.

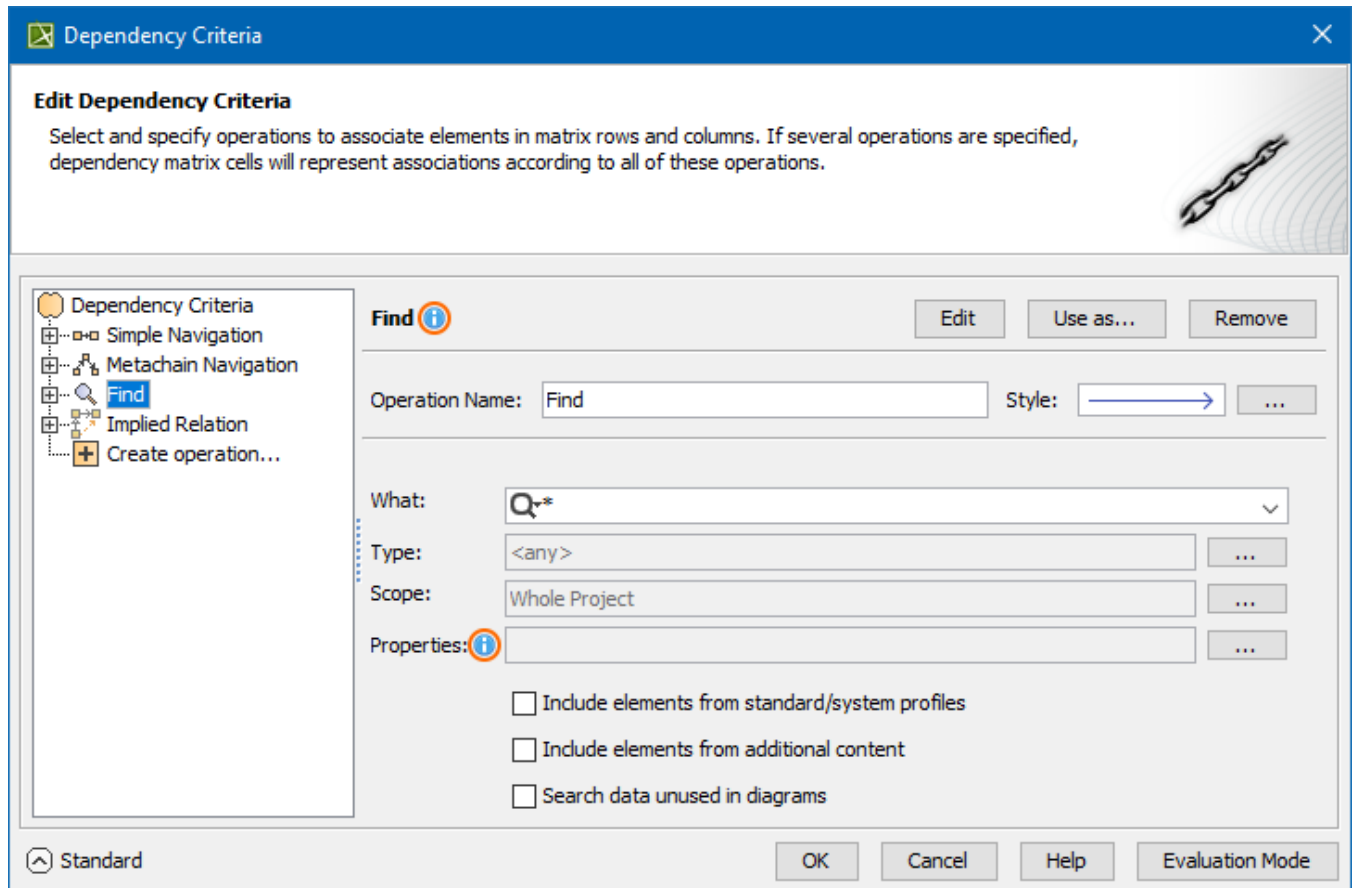

The dialog has two modes: Standard and Expert. *The Expert mode offers more options for specifying criteria and allows for creating combinations of several operations.*

To switch between Standard and Expert modes for specifying criteria

- Click **Expert** at the bottom of the dialog. The dialog is switched to the Expert mode. Click **Standard** to get back to the Standard mode.

Also, be advised that before starting to specify criteria it is useful to read the tips and warnings (if there are any), which appear after the pointer is hovered over the  button or the  button respectively.
