

# Modelica Export

To export to the Modelica file

1. In the [Model Browser](#), select the Block to export.
2. Click **File > Export To > Modelica**.

3. In the **Modelica Export Options** dialog:
  - specify the export options (select whether the unannotated SysML properties should be exported as variables, parameters, or not exported at all)
  - choose whether to generate diagram layout annotations
  - specify the output of the Modelica file.

4. Click **OK**. The Modelica (.mo) file is generated.
