

Generating Word document report

To create a .docx format report

1. In the **Tools** menu, click **Report Wizard**.
2. In the Select Template area, select SysML, and choose the report type. Click **Next**.
3. In the **Select Report Data** area, you can then select a predefined report data for the selected template (default = Built-in). Click **Next**.
4. In the **Select Element Scope** area use:
 - The **Add** button to add an element selected in the element tree to the **Selected objects** area.
 - The **Add All** button to add all elements directly owned by the element selected in the element tree to the **Selected objects** area.
 - The **Add Recursively** button in to add all elements listed under the element selected in the element tree to the **Selected objects** area.
 - The **Remove** button in to remove the selected element from the **Selected objects** area.
 - The **Remove All** button in to remove all selected elements from the **Selected objects** area.
5. Click **Next**.
6. In the **Output Options** area, define the appropriate options.
7. Click **Generate**.
Your report is generated and automatically opens. See the example: [coverage_analysis.docx](#).

Report customization

If you want to customize your report, use the [Report Wizard](#).
