

# Adding new guide words to a HazOp Table

You can add new guide words to a HazOp Table as described below.

To add a guide word to a HazOp Table

---

1. In your model, create a Profile Diagram.
2. In the Profile Diagram, create and name a Class, e.g., *NewGuideWord*.
3. Apply the «MalfunctioningBehavior» stereotype to the Class.
4. In the ISO 26262 Library, find the *AnyMalfunction* element and drag it to the Profile diagram.
5. Create a Generalization relationship from the Class created in Step 2 to *AnyMalfunction*.
6. Save and reload the project.
