# bannerMarking representation attribute

**On this page:**

- Specifying the bannerMarking representation attribute
- Editing the bannerMarking representation attribute
- Removing the bannerMarking representation attribute value

The bannerMarking representation attribute is a Data Marking representation text for the Diagram Banner marking.
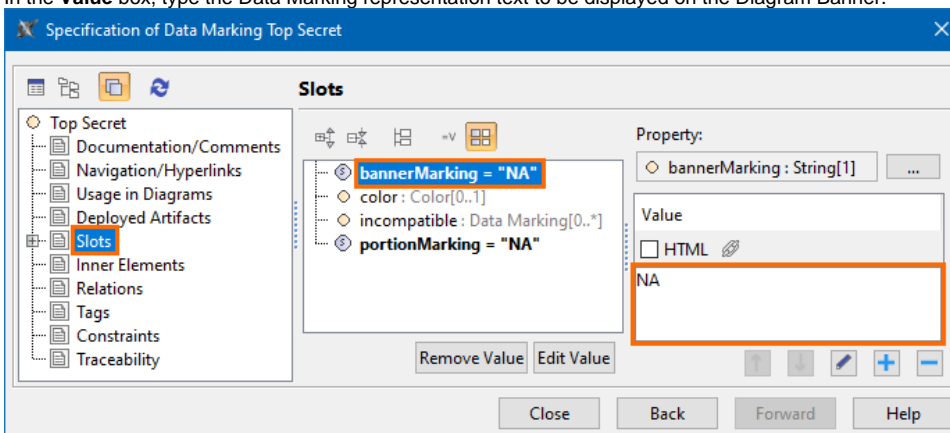

> ⚠️ **Important**
> If you make changes to the bannerMarking representation attribute, make sure to update the Diagram Banner to see the changes in the Diagram Banner markings.
## Specifying the bannerMarking representation attribute

To specify the bannerMarking representation attribute

---

- **Through the Data Marking element:**

1. Right-click the Data Marking element and open its **Specification window**.
2. In the property group list, select **Slots** > **bannerMarking**.
3. In the **Value** box, type the Data Marking representation text to be displayed on the Diagram Banner.

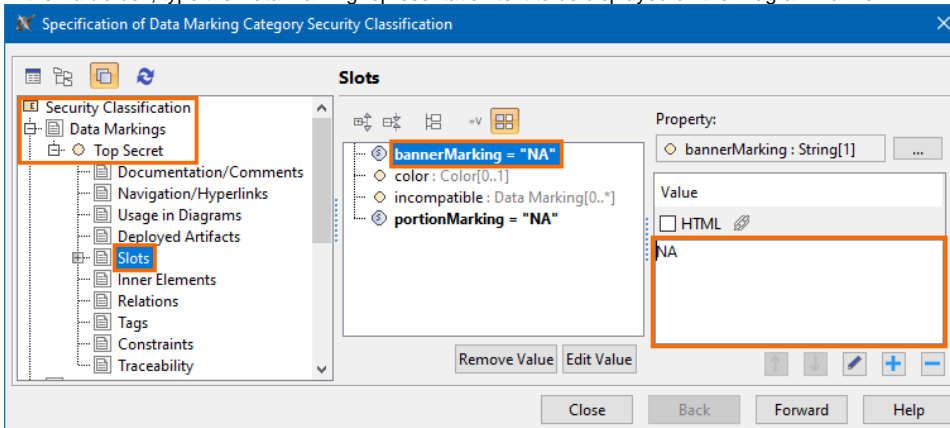

4. (Optional) Specify the display style for the banner marking:
   - If the **HTML check box** is not selected (default), the banner marking is displayed in black, 18px font size, and is centered.
   - If the **HTML check box** is selected, you can specify the color, font size, alignment, and other properties for the text via the buttons available directly in the HTML toolbar, or click the ![icon] button to open the **Advanced HTML Editor** dialog. If you select the HTML check box but do not specify the style, the banner marking is displayed in black, 9px font size, and is left-aligned.
5. Click **Close**. The banner marking is displayed on the Diagram Banner once the Data Marking is added to an element symbol of the diagram.

- **Through the Data Marking Category element:**

1. Right-click the Data Marking Category element and open its **Specification window**.
2. In the property group list, expand **Data Markings**. Data Marking elements that belong to the category appear.
3. Expand the Data Marking element you want to edit and select **Slots > bannerMarking**.

4. In the **Value** box, type the Data Marking representation text to be displayed on the Diagram Banner.

5. (Optional) Specify the display style for the banner marking.
6. Click **Close**.

## Editing the bannerMarking representation attribute

To edit the bannerMarking representation attribute

- **Through the Data Marking element:**

1. Right-click the Data Marking element and open its **Specification window**.
