

Getting started

Teamwork Cloud is the new product name for Cameo Enterprise Data Warehouse (CEDW). To start using Teamwork Cloud (or TWCloud in short), you need to understand what it is and how it can help you. This section aims to achieve two objectives:

- To explain the TWCloud system in a compact but thorough manner.
- To describe detailed instructions for installing, configuring, and running TWCloud.
- To provide data backup and restoration procedures.

Introducing Teamwork Cloud
