

# Generating web report

To create a .html/.htm format report

1. In the **Tools** menu, click **Report Wizard**.
  2. In the **Select Template** area, select SysML-Web Reports, and choose the report type. Click **Next**.
  3. In the **Select Report Data** area, you can then select a predefined report data for the selected template (default = Built-in). Click **Next**.
  4. In the **Select Element Scope** area use:
    - The **Add** button to add an element selected in the element tree to the **Selected objects** area.
    - The **Add All** button to add all elements directly owned by the element selected in the element tree to the **Selected objects** area.
    - The **Add Recursively** button in to add all elements listed under the element selected in the element tree to the **Selected objects** area.
    - The **Remove** button in to remove the selected element from the **Selected objects** area.
    - The **Remove All** button in to remove all selected elements from the **Selected objects** area.
  5. Click **Next**.
  6. In the **Output Options** area, define the appropriate options.
  7. Click **Generate**.
- Your web report is generated and automatically opens. See the example below.

## Web portal reports
