

Cameo Business Modeler Documentation

This is the home page of Cameo Business Modeler documentation.

Cameo Business Modeler is based on the award-winning MagicDraw modeling platform. The solution retains all the best diagramming, collaboration, persistence, and documentation capabilities while offering more customized capabilities tailored to **business modeling** needs.

The documentation of Cameo Business Modeler is a package that includes the documentation of these products and plugins:

[MagicDraw Documentation](#)

Introduces the main features of modeling tool: working with projects, UML 2 modeling and diagramming, collaboration capabilities, and many more core features.

[Cameo Business Modeler Plugin](#)

Provides descriptions of BPMN diagrams and elements, plus introduces BPMN specific features as well as gives guidelines for modeling business processes.
