

Compatible data sources

A Data Source is typically a reference to some data. Data in a DOORS repository can be setup as a Data Source from within DataHub. Following is the list of possible data sources with their compatible versions:

- A MagicDraw® project
- An IBM® Rational® DOORS® Next Generation (4.x, 5.x, and 6.x up to 7.0.2)
- An IBM® Rational® DOORS® Client (8.0-8.3 and 9.0-9.7)
- ENOVIA Requirements (Up to 22x FD03)
- A CSV file repository
- An OSLC Provider
