Working with OSLC features

The modeling tool can link and share data using Open Services for Lifecycle Collaboration (OSLC) integration that allows the following

- The modeling environment to work smoothly in the IBM Jazz ecosystem.
- Linking different project lifecycle artifacts in different tools without additional plugins needed.
- Seeing information details of linked artifacts without switching between different tools.

The following chapters describes how the modeling tool works with OSLC:

- Adding Data Sources for an OSLC Provider
- OSLC Preview
- Linking model elements to OSLC resources
- Creating OSLC links
- Creating OSLC queries
- Copying OSLC query results to a modeling tool as SysML Requirements
- OSLC tutorial

DataHub Explorer

Use **DataHub Explorer** to view the content of the added Data Source.

To open **Cameo DataHub Explorer**

- On the main menu, select **Tools** > **DataHub** > **DataHub Explorer**.
