

# CATIA Systems Synthesis

An integrated MDZipX plugin helps to improve the display of diagrams on the 3DEXPERIENCE platform by converting them to the MDZipX file.

**Publish MDZipX file to Teamwork Cloud** command only works if you are logged in to Teamwork Cloud. If collaboration powered by the 3DEXPERIENCE platform is enabled, you cannot work with Teamwork Cloud, so the command is not available.

You can either generate the local .mdzipx file, or you can publish the .mdzipx file to **Teamwork Cloud**:

Command	Description
<b>Export to MDZipX File</b>	The .mdzipx file contains: <ul style="list-style-type: none"><li>the .mdzip file</li><li>the .svg file for each diagram</li></ul>
<b>Export to MDZipX File Including Data from Used Projects</b>	The .mdzipx file contains: <ul style="list-style-type: none"><li>the .mdzip file</li><li>the .svg file for each diagram</li><li>data from used projects</li></ul>
<b>Publish MDZipX File to Teamwork Cloud</b>	For the published Teamwork Cloud project, the .svg file is saved for each diagram of each revision.

To export to a local MDZipX

- In the main menu, click **3DEXPERIENCE > CATIA Systems Synthesis Analysis**.
- Select **Export to MDZipX File**.

- In the **Select target directory** dialog, specify the location for the MDZipX file on your file system and then click **Save**.

To export to a local MDZipX, including data from the used projects

- In the main menu, click **3DEXPERIENCE > CATIA Systems Synthesis Analysis**.
- Select **Export to MDZipX File Including Data from Used Projects**.

- In the **Select target directory** dialog, specify the location for the MDZipX file on your file system and then click **Save**.

To publish MDZipX to Teamwork Cloud

- Login to Teamwork Cloud.
- In the main menu, click **3DEXPERIENCE > CATIA Systems Synthesis Analysis**.

3. Select **Publish MDZipX File to Teamwork Cloud**.

 more information about the authentication with the platform, see the chapter [Authentication with 3DEXPERIENCE platform](#).

 You can specify the diagram export options, such as dimensions and building time (the latter applies only to tables and matrices), in the **Project Options** dialog. See the [Diagram image export](#) page to learn more.

## Environment Options

You can enable the environment option to include diagrams from used projects when publishing MDZipX to Teamwork Cloud or exporting a local project into the MDZipX file. The MDZipX file is automatically published upon the project commit if the automatic MDZipX publishing is enabled.

To include diagrams from used projects when publishing MDZipX

1. Click **Options > Environment**.
2. In the panel on the left, select **Collaboration**.
3. Under **CATIA Systems Synthesis Analysis**, select **Publish Diagrams from Used Projects**.
4. Click **OK**.

To enable the automatic MDZipX publishing

1. Click **Options > Environment**.
2. In the panel on the left, select **Collaboration**.
3. Under **CATIA Systems Synthesis Analysis**, select **Publish MDZipX Upon Commit**.
4. Click **OK**.
