

Disabling inbound network activity

Note that after disabling inbound network activity, you will not be able to open the modeling tool Help or submit an issue.

Useful information

If you disable inbound network activity, double-clicking a project file (.mdzip) opens the project in a new modeling tool window.

To disable inbound network activity

1. Go to `<modeling tool installation directory>\bin` and open the properties file, e.g., `magicdraw.properties`.
2. In the `JAVA_ARGS` line, add the following argument:

```
-DDISABLEINBOUNDCON=true
```

3. Save and close the file.
