

Nesting image shapes

You can now drag an image to any element in a diagram as a nested element.

To drag an image to an element

1. Select an image in the diagram pane.
2. Drag it to the image shape.

Dragged images will be nested by the following elements: Package, Model, Subsystem, Instance, Node, Part, Combined Fragment, Composite State (State diagram), Interruptible Activity Region, Structured Activity Node, Expansion Region, and Conditional Node (Activity diagram).
