

Creating an empty Instance Table

To create an empty Instance Table

1. In the Containment tree, select an element to be the owner of the Instance Table.
2. Do one of the following:
 - From the main menu, select **Diagrams > Create Diagram**. Type "ins" and press Enter.
 - On the main toolbars, click the **Create Diagram** button. Type "ins" and press Enter.
 - Press Ctrl+N. Type "ins" and press Enter.
 - Right-click the element and from the shortcut menu select **Create Diagram > Other Diagrams > Instance Table**.

The newly created Instance Table opens on the right side of the application window.

- If the default name of the Instance Table is not appropriate, type a new one directly in the Containment tree.
- If the owner of the Instance Table is also a classifier, it becomes the default value of the Classifier box in this Instance Table.
