

Working with User Interface Modeling diagrams

To work with a User Interface Modeling diagram

Do one of the following:

- On the main toolbar, click the Create Diagram button and select **User Interface Modeling Diagram**. Press Enter.
- In the [Model Browser](#), click either the Package or the Model. From their shortcut menu select **Create Diagram > Other Diagrams > User Interface Modeling Diagram**.

After loading a project and creating a diagram, you can add UI modeling elements to the diagram pane.

To add new elements to the User Interface Modeling diagram pane

- Simply drag and drop the elements from the Text, Containers, Button, or Other toolbar.

To load a sample with an already created User Interface model

1. Open either the *UI Modeling Samples.mdzip* or *UI Modeling in System Development.mdzip* projects, found in <modeling tool installation directory>\samples\diagrams\User Interface Modeling.
2. After loading the sample, select the diagrams from the *Index* or *Overview* diagrams by clicking the hyperlinks.
