

Changing a Teamwork Cloud license

On this page:

- [Getting a new Teamwork Cloud license from the current license server](#)
- [Getting a new Teamwork Cloud license from another license server](#)

Changing a license or updating it through the **Server license** section on the **Settings** application requires a user with a **Server Administrator** role. Changing a license means returning the current one you are using to the FLEXnet License Server, setting the server capacity back to zero, and then leasing a new one.

License information

Here you can manage current server license.
Click 'Change license' to change the license TWCloud is running with.

License server

peleda:1101 192.168.1.2:1101

Product	Version	Connection limit	Server	Database	Expiration
Enterprise	19.0	Unlimited	Single / Cluster	Single / Cluster	Permanent

CHANGE LICENSE

The **License Information** section contains the details about the license server and the license key that is currently in use. Click **Change License** button on ly if you want to change your license because it will cause the current license to be deleted and allow you to select one of the available licenses and use it.

Getting a new Teamwork Cloud license from the current license server

To get a new Teamwork Cloud license from the current license server

1. [Log into the Teamwork Cloud Admin](#) with an Administrator account or user with a **Server Administrator** role.
2. Using the App bar, navigate to the **Settings** application.
