

Removing resources

You can remove any type of resource from the Resources app as described below.

To remove a resource

1. Open the Resources app and go the category where the relevant resource is located.
2. Click  next to the resource you want to remove.
3. From the menu, select **Remove resource**.
4. When you get the message asking if you want to remove the resource, click **Remove**.

When you get a confirmation message, it means the resource is successfully removed.
