

UAF 1.2 elements

- Achiever
- Achieves
- Activity
- Activity Performable Under Condition
- Actual Condition
- Actual Effect
- Actual Enduring Task
- Actual Enterprise Phase
- Actual Environment
- Actual Location
- Actual Measurement
- Actual Measurement Set
- Actual Milestone Kind
- Actual Organization
- Actual Organizational Resource
- Actual Organization Role
- Actual Outcome
- Actual Person
- Actual Post
- Actual Project
- Actual Project Milestone
- Actual Project Milestone Role
- Actual Project Role
- Actual Property Set
- Actual Resource
- Actual Resource Relationship
- Actual Resource Role
- Actual Responsibility
- Actual Responsible Resource
- Actual Risk
- Actual Service
- Actual State
- Actual Strategic Phase
- Affects
- Affects In Context
- Alias
- Arbitrary Connector
- Architectural Description
- Architectural Reference
- Architecture
- Architecture Metadata
- Asset
- Asset Role
- Capability
- Capability Configuration
- Capability Kind
- Capability Role
- Capable Element
- Challenge
- Challenge Kind
- Command
- Compares To
- Competence
- Competence For Role
- Competence To Conduct
- Concept Item
- Concept Role
- Concern
- Condition
- Control
- Creates
- Definition
- Desirer
- Desires
- Driver
- Driver Kind
- Effect
- Enables
- Enhanced Security Control
- Enhances
- Enterprise Goal
- Enterprise Mission
- Enterprise Objective
- Enterprise Vision
- Environment
- Environment Kind

- Environment Property
- Evoked By
- Exchange
- Exhibits
- Fielded Capability
- Fills Post
- Forecast
- Function
- Function Action
- Function Control Flow
- Function Edge
- Function Object Flow
- Geo Political Extent Type
- Geo Political Extent Type Kind
- Governed By
- High Level Operational Concept
- Impacted By
- Implements
- Information
- Information Model
- Information Model Kind
- Is Capable To Perform
- ISO8601 Date Time
- Known Resource
- Location
- Location Holder
- Location Kind
- Location Type Kind
- Maps To Capability
- Maps To Goal
- Measurable Element
- Measurement
- Measurement Set
- Metadata
- Milestone Dependency
- Mitigates
- Motivated By
- Natural Resource
- Operational Activity
- Operational Activity Action
- Operational Agent
- Operational Architecture
- Operational Asset
- Operational Connector
- Operational Constraint
- Operational Control Flow
- Operational Exchange
- Operational Exchange Item
- Operational Information
- Operational Information Role
- Operational Interface
- Operational Message
- Operational Method
- Operational Mitigation
- Operational Object Flow
- Operational Parameter
- Operational Performer
- Operational Port
- Operational Role
- Operational Signal
- Operational State Description
- Opportunity
- Organization
- Organizational Resource
- Organization In Phase
- Owns Process
- Owns Risk
- Owns Value
- Performs In Context
- Person
- Phases
- Physical Resource
- Post
- Presented By
- Problem Domain
- Project
- Project Activity
- Project Activity Action
- Project Kind

- Project Milestone
- Project Milestone Role
- Project Role
- Project Sequence
- Project Status
- Project Theme
- Property Set
- Protects
- Protects In Context
- Protocol
- Protocol Implementation
- Protocol Layer
- Protocol Stack
- Provided Service Level
- Provides Competence
- Required Service Level
- Requires Competence
- Resource
- Resource Architecture
- Resource Artifact
- Resource Asset
- Resource Connector
- Resource Constraint
- Resource Exchange
- Resource Exchange Item
- Resource Exchange Kind
- Resource Information
- Resource Information Role
- Resource Interface
- Resource Message
- Resource Method
- Resource Mitigation
- Resource Parameter
- Resource Performer
- Resource Port
- Resource Role
- Resource Service
- Resource Service Interface
- Resource Signal
- Resource State Description
- Responsibility
- Responsible For
- Responsible Role Kind
- Risk
- Role Kind
- Rule
- Same As
- Security Constraint
- Security Control
- Security Control Action
- Security Control Family
- Security Enclave
- Security Process
- Security Process Action
- Security Risk
- Sequence
- Service
- Service Architecture
- Service Connector
- Service Contract
- Service Control Flow
- Service Exchange
- Service Exchange Item
- Service Exchange Kind
- Service Function
- Service Function Action
- Service Interface
- Service Message
- Service Method
- Service Object Flow
- Service Parameter
- Service Policy
- Service Port
- Service Role
- Service Signal
- Service Signal Property
- Service State Description
- Software
- Stakeholder

- Standard
- Standard Operational Activity
- Status Indicators
- Strategic Constraint
- Strategic Exchange
- Strategic Information
- Strategic Phase
- Structural Part
- Subject Of Forecast
- Subject Of Operational Constraint
- Subject Of Resource Constraint
- Subject Of Security Constraint
- Supports
- System
- Technology
- Temporal Part
- UAF Element
- Value Item
- Value Item Kind
- Value Stream
- Versioned Element
- Version Of Configuration
- Version Succession
- View
- Viewpoint
- Vision Statement
- Whole Life Configuration
- Whole Life Configuration Kind
- Whole Life Enterprise
