Operational Connectivity

Description

The Operational Connectivity (Op-Cn) table summarizes Operational Exchanges between Operational Performers of information, systems, personnel, energy etc. and the Operational Activities that produces and consumes them. Measurements can optionally be included.
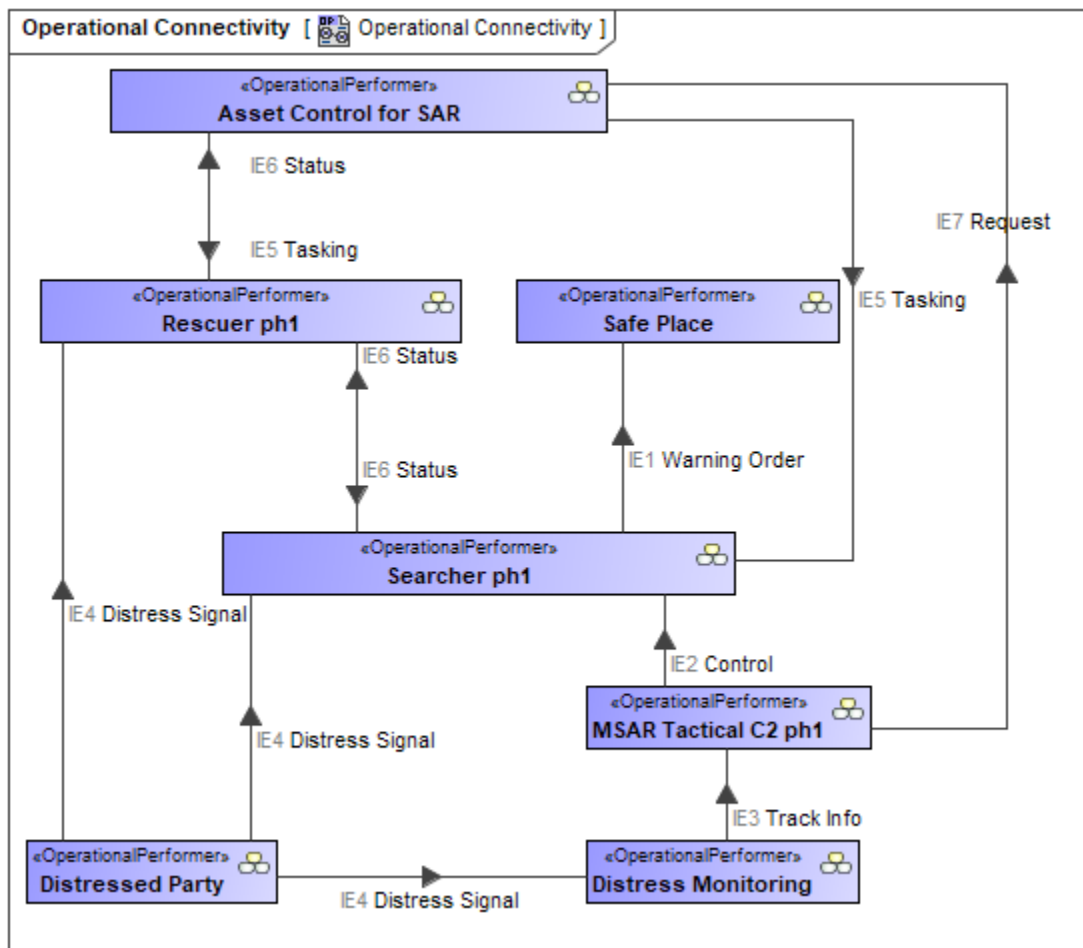

The Operational Connectivity Internal diagram describes a logical pattern of resource (information, funding, personnel, or materiel) internal flows.
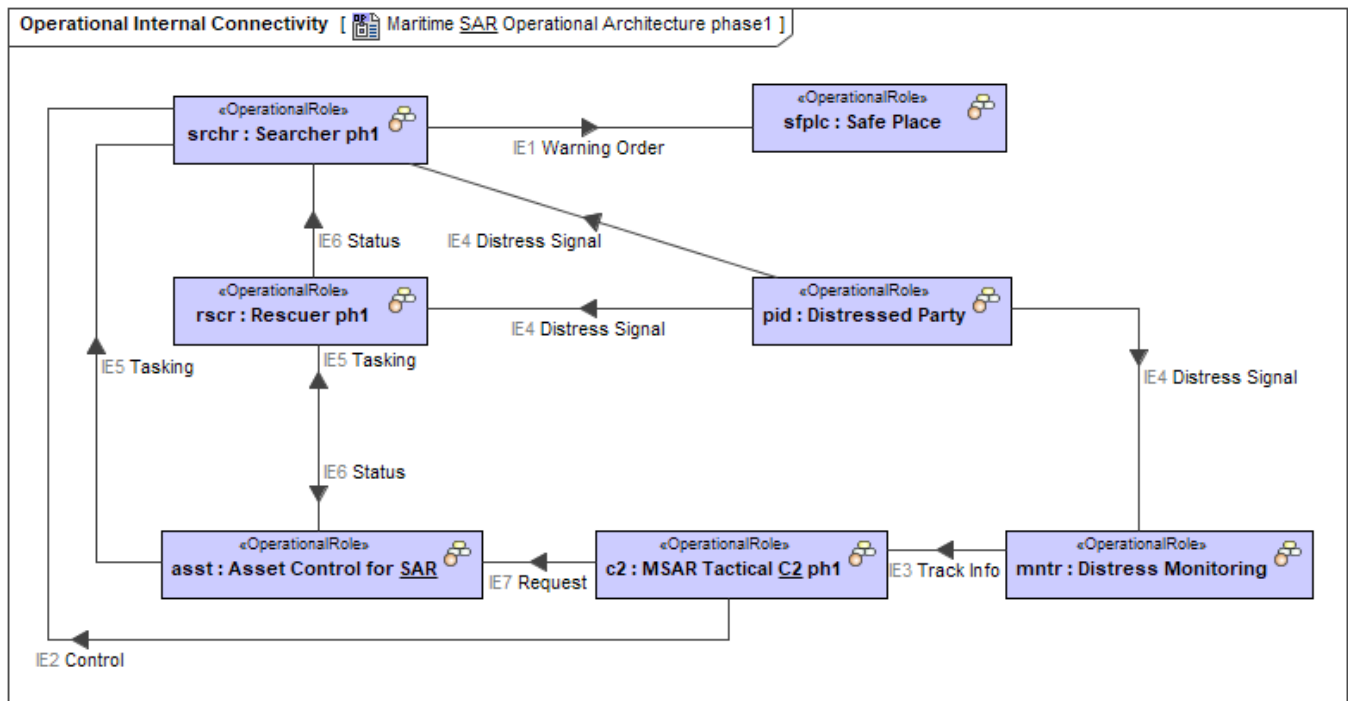

Implementation

The Operational Connectivity (Op-Cn) is represented by:

- Operational Connectivity diagram.
- Operational Internal Connectivity diagram.
- Operational Connectivity Table. An Operational Connectivity Table represents exchanges between Operational Performers.
- Operational Role-based Connectivity Table. A role-based table represents exchanges between Operational Roles.
- Reports:
  - Operational Connectivity Table Excel Spreadsheet (.xlsx).
  - Operational Role-based Connectivity Table Excel Spreadsheet (.xlsx).
