

# Security Taxonomy

## Description

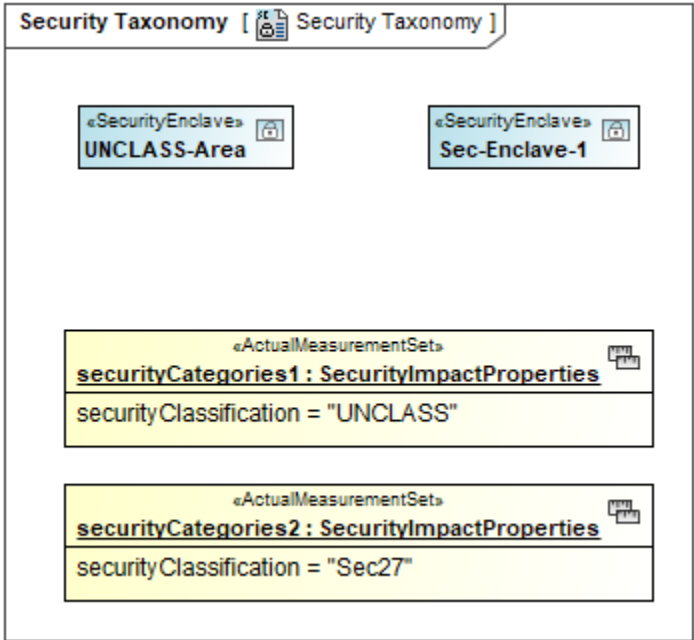

The Security Taxonomy (Sc-Tx) domain shows the security assets and security enclaves. It defines the hierarchy of security assets and asset owners that are available to implement security, security constraints (policy, guidance, laws and regulations) and details where they are located (security enclaves).

## Implementation

The Security Taxonomy (Sc-Tx) domain is represented by:

- [Security Taxonomy diagram](#).
- [Security Taxonomy table](#). This table can be used to create and describe major domain elements faster.

## Sample
