

Adding custom columns in tables

You can add any desired column to your table by clicking **Show Columns** button.

 When generating a report, only columns that are visible in your table will be included in the output.

To add a custom column

- 1. On the table toolbar, click **Show Columns > Select Columns**.
- 2. In the **Select Columns** dialog, choose the columns you want to display in the table.
- 3. Click **OK**, when you are done.

#	Exchange ID	Operational Exchange Item	Sending Role	Exchange Kind	Conforms To
