

Service Assignment Wizard

The **Service Assignment Wizard** is used to define Service for the Version Of Configuration in specified time frame.

To open the **Service Assignment Wizard**

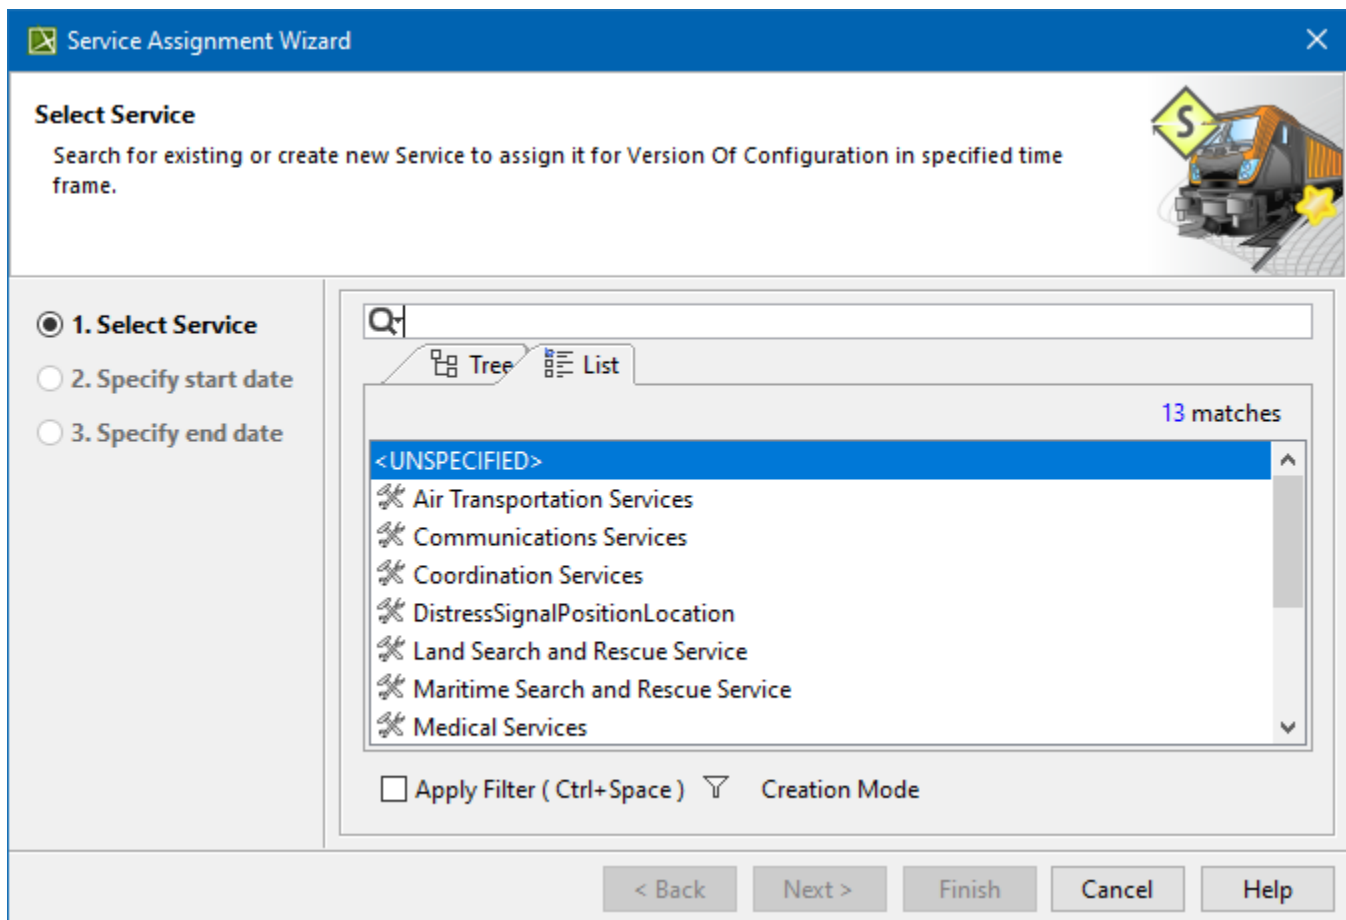

1. Open a [Services Roadmap](#) diagram (UAF)
2. On the diagram pane, right-click the Version Of Configuration and select **Service**.
The **Service Assignment Wizard** opens.

The wizard consists of three steps:

- 1 [Service selection](#)
- 2 [Start date specification](#)
- 3 [End date specification](#)

Service selection

In this step, you can select the existing or create new Service that will be assigned for Version Of Configuration.

The screenshot shows the 'Service Assignment Wizard' window, specifically the 'Select Service' step. The window has a blue title bar with the text 'Service Assignment Wizard' and a close button. Below the title bar, the 'Select Service' section is highlighted, with the instruction: 'Search for existing or create new Service to assign it for Version Of Configuration in specified time frame.' To the right of this text is an illustration of a train with a yellow 'S' sign. On the left side of the window, there are three radio buttons for the steps: '1. Select Service' (selected), '2. Specify start date', and '3. Specify end date'. The main area of the window contains a search bar with a magnifying glass icon, a 'Tree' button, and a 'List' button. Below these is a list of services with a search icon to the left of each item: '<UNSPECIFIED>', 'Air Transportation Services', 'Communications Services', 'Coordination Services', 'DistressSignalPositionLocation', 'Land Search and Rescue Service', 'Maritime Search and Rescue Service', and 'Medical Services'. A status bar at the bottom of the list indicates '13 matches'. At the bottom of the window, there are five buttons: '< Back', 'Next >', 'Finish', 'Cancel', and 'Help'. A checkbox labeled 'Apply Filter (Ctrl+Space)' and a button labeled 'Creation Mode' are also visible at the bottom of the main area.

To create a Service for the Version Of Configuration

1. In the **Select Service** step, click the **Creation Mode** button.
2. Select package where you want to create a Service.
3. Click the **Create** button.
4. In the Specification window of the newly created Service, type its name.
5. Click **Close**.

Start date specification

In this step, you can set the start date (or select the date from the Timeline) when the selected Service is being used in Version Of Configuration.

 For more information on setting the day and time, see [Date and Time Settings](#) dialog.
