

Actual Person Assignment Wizard

On this page

- [Actual Person selection](#)
- [Start date specification](#)
- [End date specification](#)

The **Actual Person Assignment Wizard** is used to assign an Actual Person for the Actual Post in specified time frame.

To open the **Actual Person Assignment Wizard**

1. Open [Personnel Availability Gantt Chart](#).
2. On the diagram pane, right-click the Actual Post and from the shortcut menu, select **Add Actual Person**.
The **Actual Person Assignment Wizard** opens.

The wizard consists of three steps:

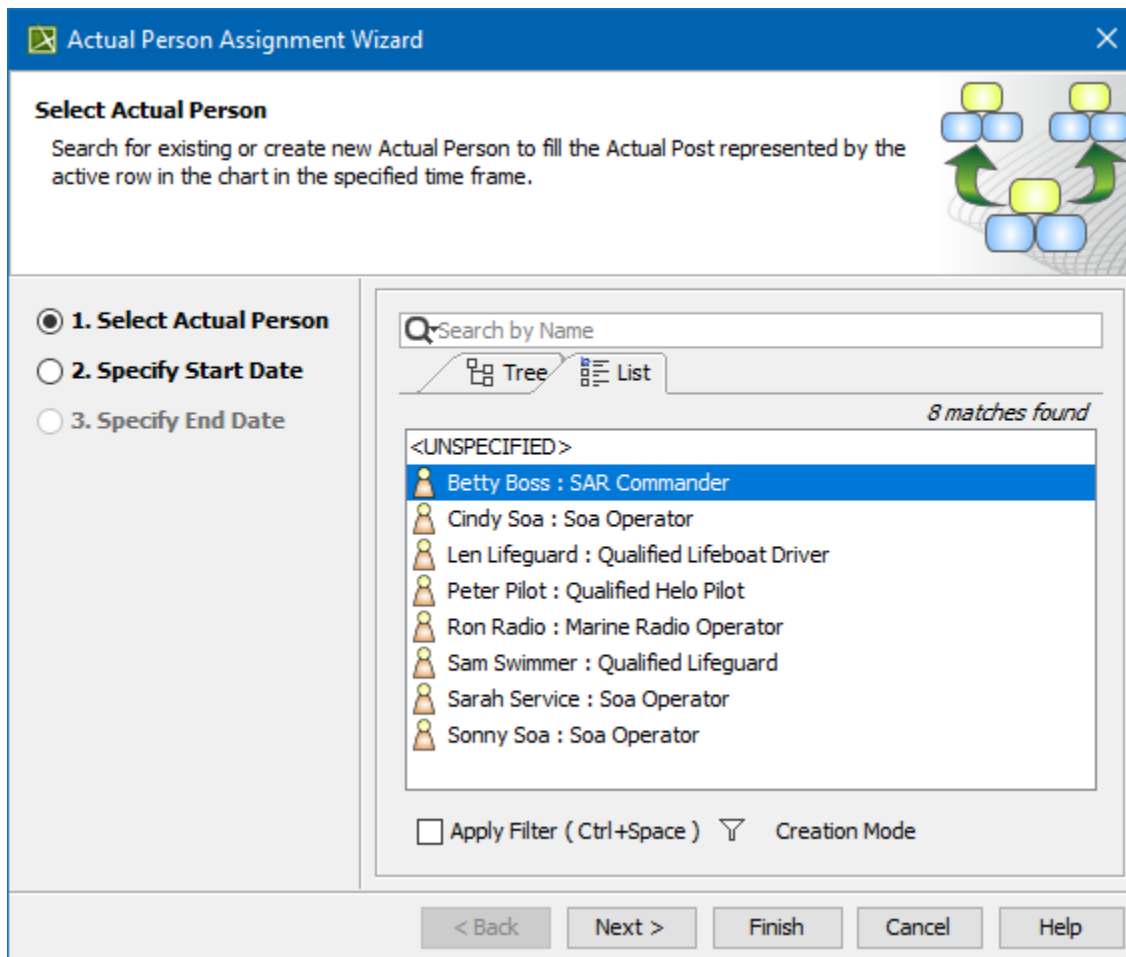

- 1 [Actual Person selection](#)
- 2 [Start date specification](#)
- 3 [End date specification](#)

Actual Person selection

In this step, you can select the existing or create new Actual Person that will be assigned for the Actual Post.

When you select (or create) an Actual Person, the relationship Fills Post is created between Actual Person and Actual Post. Start and End Dates are set to Fills Post Relationship. The bar with Actual Person is displayed in the Gantt Chart.

Actual Person Assignment Wizard

Select Actual Person

Search for existing or create new Actual Person to fill the Actual Post represented by the active row in the chart in the specified time frame.

1. Select Actual Person
2. Specify Start Date
3. Specify End Date

Search by Name

Tree List

8 matches found
