Building SV-5 matrix

The Function to Operational Activity Traceability Matrix (SV-5) addresses the direct and indirect (using the implied relations) linkage between Functions described in SV-4 and Operational Activities specified in OV-5.

The rows of the SV-5 matrix represent Functions and the columns represent Operational Activities.

To build a SV-5 matrix

1. Specify the **Row Scope** (Functions).
2. Specify the **Column Scope** (Operational Activities).
3. Click the **Rebuild** button.

Functions implements Operational Activities using the **Implements** relationship.

To map a Function to an Operational Activity

- Click the intersection between the desired elements.

⚠ Click the intersection again and the relation will be deleted.
