Display sub capabilities removed from NCV-3 chart

⚠️ The capability name becomes highlighted (the color changes) when one or more its sub capabilities are removed from the chart.

To display only the selected sub capabilities

1. Select the capability which sub capabilities you want to restore.
2. From the selected capability's shortcut menu, select **Show/Hide Sub Capabilities** and do one of the following:
     - Select the sub capabilities you want to be displayed.
     - Click **Select All** to display all sub capabilities.
3. Click **Apply**.
