

Invalid Containment Markings

Abbreviation

ICM

Description

The validation rule checks if the Containment Markings match the Data Markings of owned elements.

Severity

warning

Constrained Element

Element

Solvers

- **Update Containment Markings** - the element is displayed with up-to-date Containment Markings.

Example

The Data Marking of the Part Property *clutter* was changed from (C) to (S), but the Containment Marking of the Block *Radar* is outdated. The error is resolved via the **Update Containment Markings** solver.
