

Invalid Activity Edge source

Abbreviation

Probability[1]

Description

This validation rule checks to see if the «probability» stereotype is only applied to activity edges that have decision nodes or object nodes as sources.

Severity

warning

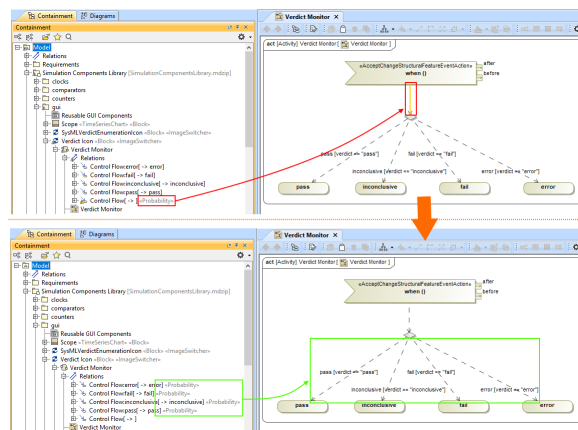

Constrained Element

Activity Edge, Parameter Set

Solvers

To fix this, apply the «probability» stereotype to all activity edges that have decision nodes or object nodes as sources.

Example

The «probability» stereotype is applied to activity edges that have decision node as a source.
