

# Creating a SysML Internal Block diagram for a Block

To create a [SysML Internal Block diagram](#) for a [Block](#)

---

1. Select the Block shape on the diagram pane. The smart manipulator menu appears.
2. Click the SysML Internal Block diagram button .  
The SysML Internal Block diagram is created and owned by the selected Block. The SysML Internal Block diagram and the owner Block have the same name. The [hyperlink](#) to the created diagram is added to the Block.
