Property with a maximum but no minimum cardinality

Showing the cardinality 0..3, the 0 means no minimum.

Note the *SubClassOf(:A ObjectMaxCardinality(3 :hasB)).* This is important, because the cardinality is actually exported and noted in the OWL ontology. In previous versions, this was not supported.

```
Ontology(<http://example.com/ontology/Unnamed>
Annotation(rdfs:label "Example"^^xsd:string)

Declaration(Class(:A))
Declaration(Class(:B))
Declaration(ObjectProperty(:hasB))

############################
