

View the MCM watermark in an exported OWL

To view the MCM watermark in your exported OWL ontology

1. Open your exported OWL ontology file. (We recommend opening the file with Notepad++)
2. Scroll to the bottom of the file.
3. You will find a watermark saying something such as:

```
<!-- Generated using the No Magic Magic Concept Modeler (19.0 SP3, build 20190627_0157-334c7d90) on 2019-07-10  
at 14:50:52 GMT -->
```

The information in the parenthesis will be different according to your application version and build.
